

## New Regulations for Shipments in China

---

Dear valued customer,

As of June 1, 2018, the General Administration of Customs of China (GACC) requires additional information for inbound and outbound cargo in China.

The adjustments include following main points:

- Enforce advanced submission of manifest 24 hours prior to loading.
- Requested data includes **firm/corporate/company registration code\*** of shipper/consignee and notify party (when applicable).
- The phone- or fax number for shipper, consignee and notify party (when applicable) will also be mandatory.
- Manifest must reflect accurately and completely all goods under bill of lading.

\* The registration code for consignee and notify party in China will be the "Unified Social Credit Code" with 18 digits. The registration code for the overseas shipper will vary from country to country.

If you have any questions or need any further assistance, please do not hesitate to contact your local Martin Bencher representative.

Sincerely,  
Martin Bencher Group
